

PART NUMBER

PFF3-120&121

DESCRIPTION

FRONT SUBFRAME FRONT BUSH

INSTALLATION GUIDE

Contents (parts per pack):

2x Polyurethane A bushes

2x Polyurethane B bushes

2 x Stainless steel sleeves

1 x Grease

Please read the complete f tting instructions and check package components before f tment. These f tting instructions are to be used as a guide and in conjunction with workshopmanual.

It is recommended that:

- -allwork to be carried out by a licensed technician;
- -all safety precautions adhered to;
- -wheel alignment to be checked and adjusted as required after any suspension work.

All fastenersmust be tensioned tomanufacturer's torque settings.

Fitting Instructions:

- 1. Support rear subframe. Loosen bolts on subframe. Remove front mount bolts completely to lower subframe to gain access.
- 2. Remove original bush from subframe bore.
- 3. Clean any dirt and corrosion from the bore, making sure to remove any sharp edges from the bore.
- 4. Fit polyurethane A bush into bottom side of the subframe bore. As shown in *Figure 1*.
- 5. Fit polyurethane B bush into top side of the subframe bore. As shown in *Figure 1*
- 6. Apply some supplied grease into bore of the bush.
- 4. Fit stainless steel sleeve into bush.
- 6. Re-ft subframe to the car. Tension all hardware to manufacturers recommended torque settings.
